### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Authorization for this examiner's amendment was given in a telephone interview with William Kinnaman on 6/17/2005.

The claims have been amended as follows:

14. The program storage device of claim 4 11 in which the step of determining whether the user has general authority to perform the requested mount operation comprises the step of determining whether the user has general superuser authority.
15. The program storage device of claim 4 11 in which the step of determining whether the user has general authority to perform the requested mount operation comprises the step of determining whether the user has superuser authority for mount operations.

### **DETAILED ACTION**

1. In response to the previous office action, Applicant has amended claims 1, 6 and 11, and added claims 16-21. Claims 1-21 have been examined.

### ***Allowable Subject Matter***

2. **Claims 1-21 are allowed.**

The following is an examiner's statement of reasons for allowance:

**Regarding claims 1, 6 and 11**, it is well known in the art that mount and unmount operations for computer file systems normally require superuser (administrator) authority. The closest prior art, Lee ("How to Mount/Unmount for Users," Linux Gazette, May 1997), teaches that Linux users lacking superuser authority are granted the privilege to perform mount and unmount operations for particular devices when permission is so designated in the /etc/fstab configuration file for any such devices. But Lee's teaching provides that either no user has authority to perform the operations, with the superuser retaining exclusive authority, or that all users have such authority; that is, Lee does not explain a subset of users, less than the whole, having mount/unmount authority.

Providing mount/unmount authority to a subset of users, as opposed to all users, is not an obvious modification of the prior art because such a modification requires the addition of a nontrivial infrastructure for tracking the authority of each user in relation to

each device in the file system rather than merely setting a flag for each device in the /etc/fstab file.

**Claims 2-5, 7-10, 12-15, 16-17, 18-19 and 20-21** are allowed by virtue of their dependence on claims 1, 6, 11, 1, 6 and 11, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Elmore whose telephone number is 571-272-4224. The examiner can normally be reached on M 10-8, T-Th 9-7.

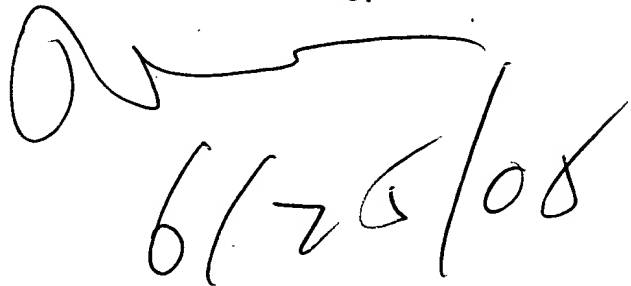

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Morse can be reached on 571-272-3838. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
